

The image features a detailed wooden screen carving of pine trees. The carving is made of light-colored wood and shows several pine branches with needles and fan-shaped leaves. The background is a solid light brown color. The carving is set within a wooden frame that has a semi-circular cutout on the right side. The Japanese characters '欄間' (Ranma) are overlaid on the left side of the image.

Osaka Transoms (Traditional Craft Products Designated by the Minister of Economy, Trade and Industry)

Osaka Screen Carving (Traditional Craft Products Certified by the Governor of Osaka Prefecture)

歴史【History】

Osaka Transoms

This Osaka-style woodwork, which provides Japanese-style houses with a means of tasteful decor, as well as ventilation, evolved from a style that began in the early 17th century. Early examples can be seen today in Hijiri Shrine and Shitennoji Temple, Osaka Prefecture.

Some transoms feature pictorial carvings, taking advantage of the natural grain of yakusugi-cedar wood, or are openworked in harmony with the even grain of paulownia wood. Osa and Kumiko transoms, on the other hand, which employ special joinery techniques, depict simple geometrical patterns, while Yonuki transoms are uniquely patterned in vertical latticework.

Osaka Screen Carving

This carving technique, which originated in the early 17th century, is nowadays also applied to many furnishings, making an effective use of yakusugi cedar and other wood grains.

欄間 Screen Carving

Width 1200~1300mm

Item No. T12-1	
Size	W1365 x H400 x D50
Remark
